THE QUEEN'S HOSPITAL
Pay Patient Department

THE QUEEN'S HOSPITAL, PAY PATIENT DEPARTMENT, offers superior accommodations and attendance for pay patients. The recent "Fauahi Annex" addition to the Hospital, with its modern equipped Operating Room, Sterilizing, Anesthetic and Bath Rooms, also Portable Baths, afford an up-to-date service in every respect, with Resident Physician, staff of Trained Nurses, &c., also an Elevator Service. The following are the rates:

Private rooms...\$2.50 to \$3.50 per diem.

Practicing Physicians are invited to place patients in private rooms, such patients to remain under the care of their own physician, subject to the rules of the Hospital; such patients will, however, have to pay their own doctor.

Applicants for admission to the Hospital must furnish the Superintendent a surety for Hospital charges, or else pay two weeks in advance, which must be renewed every week thereafter. In Surgical cases a charge of from \$5 to \$15 is made for use of Operating Room and materials. Surgeons are invited to use the Operating Room of the Hospital under the above specified rates, and arrangements for hours can be made with the Superintendent.

Persons desiring admission to the Hospital should apply to the Superintendent, on the premises, Punchbowl and Miller streets.

For further information or reference, apply to the Superintendent or Resident Physician at the Hospital, GEO. W. SMITH, Esq., Secretary (Benson, Smith & Co.), or E. F. BISHOP, Treasurer (C. Brewer & Co.). 7209

HONOLULU SEWER SYSTEM
AND THE LAW OF SEWERS

Work of Extension in Progress--More Than
Fifty Miles of Sewers--Expenses
and Scale of Rates.

C. S. Holloway, Superintendent of Public Works, stated yesterday, in answer to a question, that the department was proceeding with the construction of the Channel street sewer, the extension of the School street sewer and a sewer to Camp No. 3 mauka of School street. The last mentioned locality is in one of the sections that has lately given the Board of Health considerable trouble from its insanitary condition.

There is an appropriation of \$36,500 in this year's loan bill for the extension of the sewer system and storm drains in Honolulu. It is out of this appropriation that the work in hand as above is being done.

J. Vanhuizen, Superintendent of Sewers, in his report to the Superintendent of Public Works for the year ending June 30, 1905, says:

"Seven thousand eight hundred and eighty-one (7881) linear feet of sewers have been constructed during the past year. There still remains about 20,704 feet of sewer to be constructed to finish the 'Vincent & Belser' contract."

From the same report it is learned that the total number of feet of sanitary sewers laid in Honolulu to date is 271,397.7, or 51.41 miles.

The accounts of the entire system of sanitary works for the year are as follows: For running expenses of the sewer pumping station \$7767.93 was expended out of \$7800 appropriated; running expenses of excavator and garbage service, \$35,639.53 out of \$37,200; running expenses of garbage crematory, \$1605.66 out of \$2760; maintenance sewer system, \$4798.86 out of \$4800, making a total expenditure of \$49,811.98 out of \$52,560 appropriated, leaving \$2748.02 unexpended. Then, in the salary bill, the sewerage system cost \$6560 besides.

Collections of sewer rates for the year amounted to \$13,155.88. Adding \$6845.75 from garbage and \$1957.50 from excavator, there is a total of \$21,959.13 government realizations from Honolulu sanitary works.

The Superintendent of Sewers has his salary of \$1500 a year paid out of the item for maintenance. The Inspector of Buildings, Plumbing and House Sewers, with a salary of \$1920, is under the Board of Health.

For the two years ending June 30, 1907, the appropriation out of current revenue for running expenses of sewer and pumping station and installing oil burning apparatus is \$33,000, besides which there is an item of \$9000 for maintenance of the sewer system of Honolulu. Thus \$42,000, or \$21,000 a year, will be the cost of the system for the current period.

Besides the \$13,000 and odd collected in rates for the past year, the department is figuring up arrears with the prospect of their amounting to \$15,000 or \$20,000. It is required by the law, as will be seen below, that the rates shall not be in excess of an approximation to the expenses of maintenance. From the showing above made, presuming that a fair proportion of the arrears are collectible, it would appear that the legal parity is about attained. There are 1677 privileges now on the rate books, and it may be calculated that the ratio of increase in revenue will be greater than in expenses.

Connections are being made with the sewers at the rate of twenty-five or thirty a month. Inspector E. G. Keen reported to the Board of Health 129 sewer connections made, and 185 houses connected with sewers, for the first six months of this year. The total number of people using the sewer system in July 1, 1905, approximated 29,000.

There does not appear to be any legal compulsion for property owners to make use of the sewers when brought within their reach. Possibly the only power in this regard is that of the Board of Health under its authority to condemn insanitary premises after due notice.

Mr. Vanhuizen in his report recommended the sewer of the Punchbowl slope, above Luso and including Alapai street; also the proposed extension of Artesian street, thence along Axiylan to Beckwith street and Metcalf road; also a number of streets in Kewalo district, but not until some filling to grade has been done; the first Pitkoi street extension from Wilder avenue to Pensacola street; also Quarry, Prospect and Spencer streets.

THE SEWER LAW.

The sewer law as amended by the Legislature of 1905 is as follows:

"Section 1935. It shall be the duty of the Superintendent of Public Works, conforming to the requirements of the Board of Health, to direct and superintend the cleaning of the public streets and by-ways of any city, town or village in the Territory of Hawaii, the removal and disposal of garbage, dead animals and other nuisances therein, the cleaning of cesspools and connecting of premises with the public sewer in such city, town or village.

"Section 1936. The rates of charges for such services and for use of the sewer shall be fixed from time to time by the Superintendent, subject to the approval of the Governor, and shall be reasonably approximate to the cost of

work done and material used. Rates of charges for sewer use shall be fixed as nearly as may be, so that the entire yearly receipts for sewer use shall not exceed the total yearly cost of maintaining and repairing the sewers, together with the yearly interest on the bonds representing the cost of the sewer system.

"Section 1937. The rates and charges in this chapter provided, for the collection of garbage, shall be payable to the Superintendent quarterly in advance, and the charge for sewerage semi-annually in advance. Charges for cesspools, sewer connections and removal of animals and other nuisances shall be payable on demand; and, to secure such payment, the Superintendent of Public Works may require a deposit in advance.

"Section 1938. If a sewer rate shall remain unpaid for fifteen days after it is due, ten per cent. in addition to the regular rate shall be charged, and every such sewer rate or charge shall be a lien upon the property connected with said sewer, which said lien shall attach to said property as of the date when said sewer rate or charge is due and payable to said Superintendent of Public Works, as in this chapter provided. The rates and charges shall be payable by the owners and occupants of the premises in respect to which the services are rendered, who shall jointly and severally be liable therefor.

"Section 1939. District magistrates shall have jurisdiction to hear and determine all civil actions, suits or proceedings brought by the Superintendent of Public Works for the collection and enforcement of collection and payment of all sewer rates or charges which may be assessed, as above set forth, notwithstanding the amount claimed.

"Section 1940. The record books of the Superintendent of Public Works, in the matters in this chapter above specified, shall be prima facie proof of the amount of sewerage rates or charges due and unpaid to said Superintendent."

SEWER CHARGES.

Rates of annual charges for use of sewer were made by John A. McCandless, Superintendent of Public Works, April 1, 1901, and have not since been changed.

For dwelling houses and office buildings the rates are as follows:

500 or less square feet area (20x25), \$3 per year.

500 to 800 square feet area (25x32), \$4 per year.

800 to 1100 square feet area (30x36), \$5 per year.

1100 to 1400 square feet area (35x40), \$6 per year.

One dollar additional for each 300 square feet of floor area.

For lodging and tenement houses and stores, the charge is 75 cents for every adult inmate.

Restaurants, saloons and hotels are charged by a scale for fixtures, being \$2, \$4, \$1, \$2 and \$6 each for different utilities named, and by numbers used up to \$10, \$18, \$3, \$9 and \$13 for five of each utility.

Floor drains are charged \$5 each.

For laundries and factories the rates run from \$5 for two persons employed to \$12 for six persons, and \$150 additional for each person. Each laundry tub is charged \$5.

Stables are rated at 75 cents for each head of live stock.

MRS. WILE'S CASE
IS HOPELESS

Mrs. W. C. Wile of Danbury, Ct., whose husband Dr. Wile is a good friend of Hawaii was, at last accounts, in a serious condition. The Danbury News says:

The sad announcement is made today that the attending physicians hold out absolutely no hope for the recovery of Mrs. William C. Wile, who was so seriously injured in a headlong fall over a balustrade and down a flight of stairs at her home, Tarryville, on the afternoon of September 30. The patient's strong constitution and splendid vitality is sustaining her will in her present condition but the end is but a matter of time. How great the length of that time may be the physicians can not say. The end may come within a short time but her illness is more likely to be prolonged for several weeks. But nothing that medical skill or science can do will avail to avert the ultimate consequences of the injury to her spine, from which she has been confined to her bed in a condition of partial paralysis since the day of the accident.

This announcement will be especially saddening to the many friends of Dr. and Mrs. Wile, who have been sharing with the family since the time of the accident the hope that the injury was not as severe as was feared and that the patient would ultimately recover. The earlier symptoms in the case strengthened this hope somewhat but a positive diagnosis of the patient's injury was impossible at that time. Dr. Robert T. Morris, the eminent specialist, who was summoned from New York on the Monday following the accident, in consultation with Mrs. Wile's physicians, agreed with them that the extent of the injury could not be positively determined within two weeks. Dr. Morris came to this city again on Saturday for a second consultation and it was then determined that the patient had sustained a fracture of the spine and the destruction of the spinal

cord. That an operation would be hopeless and would hold out no prospects of relief for the patient was also decided at this consultation.

Dr. Wile and his family will have the sympathy of the entire community in their misfortune. The accident and its results seem the sadder from the fact that Mrs. Wile was in the full enjoyment of splendid health and nearly everything that there was to make life pleasurable, at the moment that the slipping of a treacherous rug beneath her foot caused her to lose her balance and to plunge down the stairway. A careful investigation by the members of the family of the circumstances of the accident led to the belief that a rug was responsible for the fall. Mrs. Wile was in the narrow hallway at the

side of the stairs that lead from the second floor of her home to the kitchen when she fell. A bee had found its way into the house and lodged upon a window on the opposite side of the stairway. Leaning over the balustrade running along the hall at the edge of the stairway, Mrs. Wile attempted to brush the insect away with a piece of newspaper. Her foot was upon the edge of a rug, which slipped upon the smooth floor, and losing her foothold, her balance was suddenly gone and she toppled over the balustrade and fell to the bottom of the stairs. The situation of the rug and the patient's own story of the occurrence, which naturally is vague, all corroborate the theory that the accident occurred in this manner.

NOW'S THE
TIME TO BUY

BON BONS

(Holiday Crackers.)

Our assortment of Holiday BON BONS is just in so the earlier you come the greater variety you have to choose from.

Who ever heard of a successful Thanksgiving or Christmas dinner without BON BONS? The tug at each end, the snap and the unwrapping of the mysterious prize within, together with the fun and laughter, makes the BON BON indispensable.

Our assortment includes those with HEAD-DRESSES, HATS, CAPS, JEWELRY, CHARMS, FIREWORKS, PUZZLES, ETC. Prices per box of one dozen, 35c to \$2.00.
